## 1.1 Background:

In the current system the user who want to recharge their mobile have to go to any shop where recharge is available. They have to go the shop and ask for the specific recharge. The shopkeeper keeps the record of the number in any book.

## 1.2 Objective:

This project is my effort for Online Mobile Recharge of mobile. This project useful for online recharging of mobile. This System provides recharge of many mobile companies as well as all kind of recharge are possible. This System will provide facility for customer to recharge mobile at anytime from anywhere. This System keeps the history of the past recharges. The user have to register himself.

## 1.3 Purpose

The purpose of the web application is the automation of mobile recharge. It provides facilities to Admin:

- To add Tariff plans.
- To update, create and delete the tariff plans.

User:

- To enter and modify personal detail.
- To register himself.
- Can recharge at anytime.
